

Benefits of U-tena project

My officials are Debrah Kiangui. I am a pupil at Star of Hope primary School and I'm in STD 8. I was a weak student in mathematics and composition writing but before the cock could swallow maize, God opened another door and U-tena was there for me. At least now I can score mathematics 60% and above from 20%, composition from 08 to 28.

Our mentor Jeremy, also mentors us lifeskills and leadership. Lifeskills has helped me to deal with my ulcers, discourage peer pressure and choosing friends wisely. Leadership aided me to be more confident and social. There before I could not stand before people and greet them or pray but now I'm able to.

This project have taken various exposures like in order to learn more about the outside world and open our minds. After two or three weeks motivational talks (MT) are held at the St. Elizabeth hall and are headed with a motivational speaker and other mentors. They motivate us not to look our backgrounds in order to remove our parents from poverty. Impromptu meetings of our parent are also held to talk about our improvements at school and our ps and qs at home and also help us in decision making.

Even though I come from a single parent family (father) I know U-tena will be in hand to hand to help me achieve my goals of becoming a hero surgeon/optician. All I want to say is THANK YOU! THANK YOU! THANK YOU!
