MY EXPERIENCE IN A-LOT CHANGE
PROJECT

In the year 2015 I was a
failer where I was not courageous
and solving some difficult situation
it was an insurmountable task. When
I reached ~~sub~~ in standard six I
started improved my performance and
through this project I now feel
courageous and more strong that I
can solve the difficult things
around me.

Self esteem and self confidence
had improve because of this project.
I was not a talkative person
but now I can stand in front
of people and give a speech. My
mentors were very kind to me
that I could even ask them questions
I was an idiot person in the
year 2015 not knowing an idiot
mind is a devil work shop.
